# Mid-Funnel Deals Take 3x Longer to Close Than Won Deals

## Pipeline Snapshot

8

Total Active Deals

\$708,500

Total Pipeline Value

\$88,562

Avg Deal Size

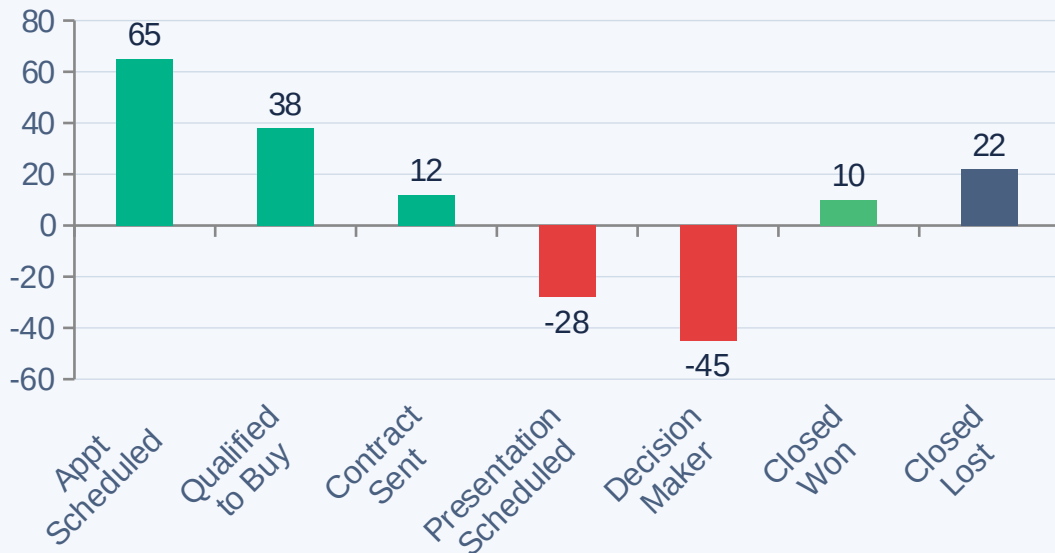

12 days

Avg Days to Close

**Key Evidence:** Closed Won deals average 10 days to close vs. 65+ days for mid-funnel appointment and presentation stages — a 6x gap.

# Overdue Mid-Funnel Deals Signal a Coaching Gap, Not a Pipeline Gap

Avg Days to Close by Stage (negative = OVERDUE)

## Root Cause Analysis

### 2 deals OVERDUE

Presentation & Decision Maker stages show negative days-to-close

### Size vs. Speed gap

Closed Won avg \$150K vs. \$88K overall — bigger deals get more attention

### Multi-stakeholder stall

Mid-funnel requires buy-in from multiple contacts; no follow-up cadence = deals go dark

**Key Evidence:** Closed Won deals average \$150K vs. overall average of \$88K — larger deals close faster because they receive more rep attention and executive sponsorship.

# Implement Deal Health Scoring to Surface Stalled Deals Before They Go Cold

01

## Flag Stalled Deals

Alert reps when a deal has 0 activity for 14+ days in mid-funnel stages

→ Expected Outcome

*Reps re-engage before deals go completely cold*

02

## Weekly Pipeline Reviews

Focus manager attention on presentationscheduled and decisionmakerboughtout stages

→ Expected Outcome

*Reduce avg days-to-close by 20% through earlier coaching*

03

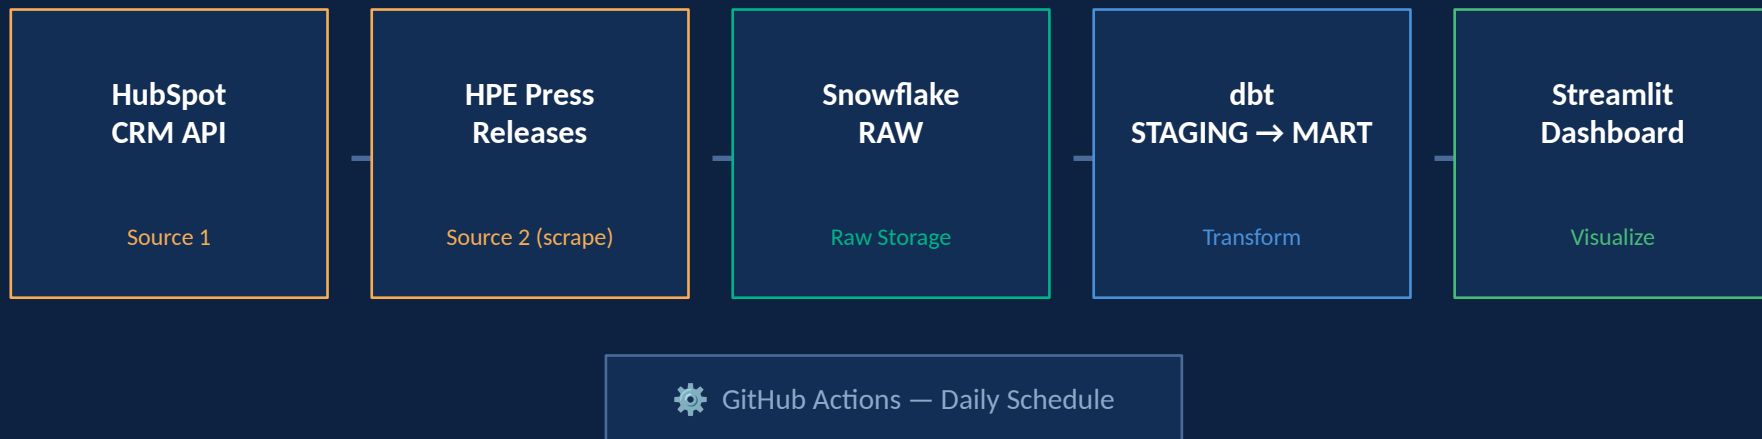

## GreenLake Pipeline Tracking

Build separate pipeline view for recurring GreenLake deals vs. one-time transactions

→ Expected Outcome

*Improve forecast accuracy for CFO reporting on ARR growth*

# End-to-End Pipeline Architecture

## Skills Demonstrated:

- SQL-based pipeline analysis via dbt models
- Python ETL: API extraction + web scraping
- Automated orchestration with GitHub Actions
- Interactive Streamlit dashboard (deployed publicly)
- Company knowledge base (15 sources, 3 wiki pages)
